The Responsive Cities Symposium is one of the main activities carried out under the Knowledge Alliance for Advanced Urbanism - KAAU (www.ka-au.net ^[1]) EU co-funded project.

Based on the assumption that the increasing availability of data creates new opportunities not only for monitoring and management, but also for changing the way we describe, understand and design cities, KAAU is seeking to promote the innovative education and training that emerging technologies require, developing courses, symposiums and an educational and training platform.
